Installing the Microsoft RDP Client on an Apple/Mac PC

1. Purpose

The purpose of this document is to provide the proper directions for installing the RDP client onto an Apple/Mac PC

2. Scope

These procedures are directed at users with Apple/Mac based PCs that need to connect remotely to the AoA servers

3. Prerequisites

None.

4. Responsibilities

It will be the responsibility of AoA's Department of Information Technology to keep these directions updated. Should these procedures require an update, a modification, a correction, etc. – the IT department should be notified by way of the helpdesk ticketing system found at: <u>https://support.archatl.com/</u>

5. Procedure

The following page(s) contain instructions on using Remote Desktop to connect to AOA Staff Terminal Server from home.

Support Matrix

Please note: Before you attempt to connect to AOA Terminal Server remotely, please make sure your operating system (Apple OS X 10.12 or later) has all applicable security updates installed and that you have up-to-date Anti-Virus software installed.

In this example we are using OS X 10.15.1 Catalina.

To connect to your Terminal Server Desktop / PC from a Mac you will need to use the <u>Microsoft Remote Desktop application</u> for Mac version 10.3.8.
